Saul Herman

SUMMARY

IT Manager at Neara since June 2026; formerly Senior Client Platform Engineer at Atlassian. Builds identity lifecycle automation and AI-agent-operated IT platforms.

- Designed and shipped neara-IT: automated onboarding, offboarding, access audit, and remediation across 15 SaaS services on AWS serverless.
- Cut account lifecycle work across 13 providers down to a single Slack approval click.
- Scaled macOS fleet management to 17,000+ devices at 75%+ CIS Level 2 at Atlassian.

SKILLS

- **Platforms & Tools:** Google Workspace, Slack, Microsoft Entra ID, Atlassian Suite, GitHub, 1Password, Jamf Pro, Okta, Omnissa
- **Cloud & Infrastructure:** AWS (Lambda, DynamoDB, EventBridge, SAM), Terraform, Cloudflare Workers
- **Automation & AI:** Python (Click, Textual, uv), Shell/Bash, PowerShell, LiteLLM, Claude/LLM-assisted operations, agent skill design
- **Frameworks & Methodologies:** SOC2, CIS Benchmarks, ITIL, Zero Trust, Identity Lifecycle Management

PROJECTS

Extraction Lab | Founder & Lead Developer

Jan 2026 – Present | extractionlab.app

- Developed a professional coffee intelligence platform utilizing local AI (Gemma 4) for extraction analysis and dial-in assistance.
- Engineered a deep Apple ecosystem integration including Live Activities, Dynamic Island support, and an Apple Watch companion app.
- Implemented smart inventory management with peak-flavor alerts and professional sensory data models using radar charts.

EXPERIENCE

IT Manager | Neara

June 2026 – Present | Sydney, Australia (Remote)

- Since June 2026, designed and built an identity lifecycle platform that automates onboarding, offboarding, access audit, and remediation across 15 SaaS services: Google Workspace, Slack, Microsoft Entra ID, GitHub, Atlassian, JetBrains, Bitbucket, Zoom, HubSpot, Bitwarden, Fibery, Rollbar, ClickHouse.
- Shipped 18 AWS Lambda functions with EventBridge schedules, DynamoDB approval state machines, and an automated release pipeline with digest-pinned rollback.
- Built self-service IT: a Textual TUI for non-technical operators and a Slack bot with /reset-password, /reset-mfa, /recover-bitwarden, and /reissue slash commands.
- Enforced safety by design: dry-run defaults, per-user-per-service failure isolation, idempotent re-runs, and 2,100+ mocked tests.
- Automated HR-driven onboarding (ChartHop detection, Friday Slack approval, start-day delivery) and daily offboarding detection with same-day execution.
- Governed AI spend by automating LiteLLM budget-increase tickets with approval thresholds and manual-action flagging.
- Operated an AI-agent development workflow: 14 reusable agent skills, 1Password Environment secrets with FIFO mounts, and scheduled credential health checks.

Senior Client Platform Engineer | Atlassian

April 2023 – March 2026 | Sydney, Australia (Remote)

- Manage 17,000+ corporate macOS and 15,000+ BYOD devices via Jamf/Omnissa, plus 450+ Windows; implemented 75%+ CIS Level 2 for corporate macOS.
- Automate deployment of macOS browser configurations and security controls across 7 browsers using Python and Jamf Pro Custom Schema profiles.
- Optimise Bitbucket repositories for SOC2 compliance and code consistency using Bitbucket Pipelines.
- Bolster fleet security by automating detection and removal of non-compliant BYOD macOS and Windows devices.
- Act as team lead during manager's extended leave; own cross-functional meetings and represent the team in project discussions.

Client Platform Engineer | Atlassian

October 2020 – March 2023 | Sydney, Australia (Remote)

- Grew MDM coverage from 10,000 to 13,000+ devices across Jamf Pro and Omnissa.
- Enhanced ZeroTrust with Jamf/Workspace ONE endpoint data; developed zero-touch deployment scripts to reduce onboarding friction and provisioning time.
- Tested and qualified 2 new macOS and Windows 11 versions prior to fleet-wide deployment.
- Pioneered macOS early adopters program (300+ signups, 93% participation); now used for testing across teams.

Workplace Productivity Analyst | Atlassian

December 2019 – October 2020 | Sydney, Australia (Remote)

- Triaged IT requests for 10,000+ employees globally; provided HW/SW and in-person support for 2,000+ Sydney staff.
- Managed audio-visual support across 3 Sydney offices.

IT Specialist | SafetyCulture

June 2019 – October 2019 | Sydney, Australia

- Second on internal IT team; managed Okta, G Suite, Atlassian and automated on/offboarding workflows.
- Zero-touch Mac setup; 90%+ first-response SLA; documentation and dashboards to reduce support wait times for 300+ users.

Internal Support Specialist | Ansarada

February 2017 – June 2019 | Sydney, Australia

- Managed cloud applications (Okta, Office 365, Slack, Confluence, AssetPanda); streamlined operations across a growing global company.
- Implemented Jamf Pro MDM from scratch and led AD-to-Okta migration for centralized identity and access management.
- Set up IT for new offices; automated account creation and ticket workflows via API integrations.
